

Final Deliverables Report

Date	14.11.2022
Team ID	PNT2022TMID53401
Project Name	Inventory Management System for Retailers

Team members and their Contribution:

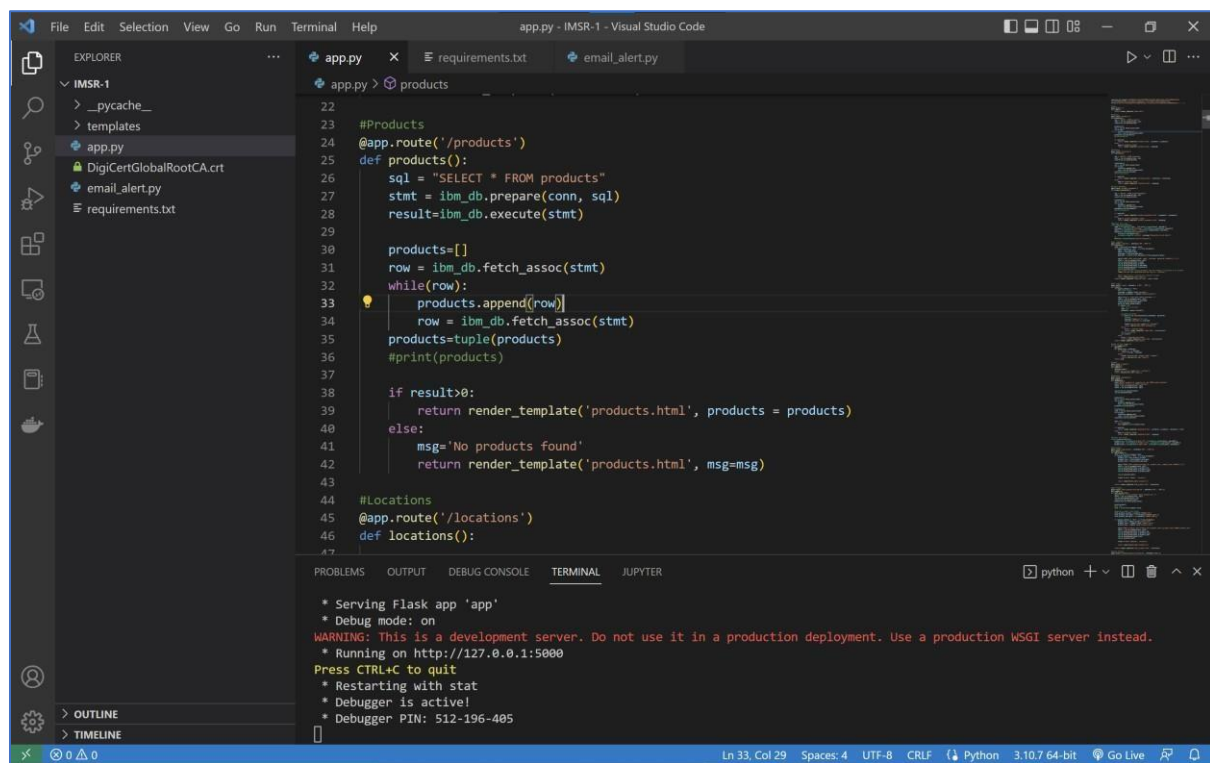

Name	Roll no	Contribution
S.Shashwanth	718019I303	Frontend – 5 Pages, Integration of Sendgrid, Deployment of using docker and Kubernetes.
Teja Reddy	718019I325	Frontend – 5 Pages, Documentation
Santhosh	718019I337	Frontend – 4 Pages, Documentation
Nikhil	718019I361	Backend Fully (For all 14 Pages), Integration of IBM Cloud, Deployment of using docker and Kubernetes.

Introduction:

1. Sprint 1 – Backend
2. Sprint 2 – Frontend
3. Sprint 3 – IBM Cloud Integration + Integration of SendGrid
4. Sprint 4 – Deploying the application using Docker and Kubernetes **Sprint 1 – Backend:**

All the routes to each page and APIs are created.

Example, (For Products page)

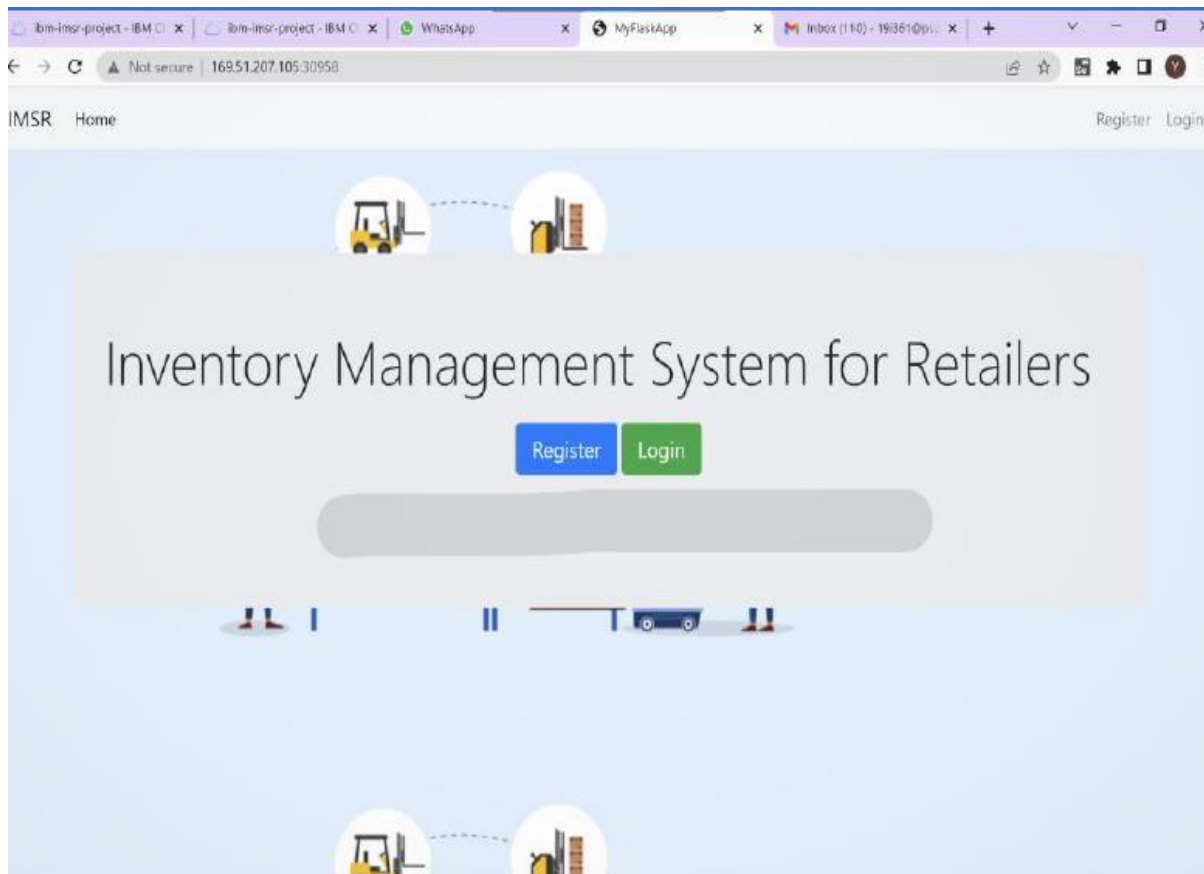

The screenshot shows the Visual Studio Code editor with a project named 'IMSR-1'. The Explorer sidebar on the left shows the file structure: `_pycache_`, `templates`, `app.py`, `DigiCertGlobalRootCA.crt`, `email_alert.py`, and `requirements.txt`. The main editor window displays the `app.py` file, specifically the `products` route. The code defines a `products` function that queries a database for products and renders a `products.html` template. The terminal at the bottom shows the Flask development server running on `http://127.0.0.1:5000`.

```
22
23 #Products
24 @app.route('/products')
25 def products():
26     sql = "SELECT * FROM products"
27     stmt = ibm_db.prepare(conn, sql)
28     result=ibm_db.execute(stmt)
29
30     products=[]
31     row = ibm_db.fetch_assoc(stmt)
32     while(row):
33         products.append(row)
34         row = ibm_db.fetch_assoc(stmt)
35     products=tuple(products)
36     #print(products)
37
38     if result>0:
39         return render_template('products.html', products = products)
40     else:
41         msg='No products found'
42         return render_template('products.html', msg=msg)
43
44 #Locations
45 @app.route('/locations')
46 def locations():
47
```

PROBLEMS OUTPUT DEBUG CONSOLE TERMINAL JUPYTER

```
* Serving Flask app 'app'
* Debug mode: on
WARNING: This is a development server. Do not use it in a production deployment. Use a production WSGI server instead.

* Debugger PIN: 512-196-405
```

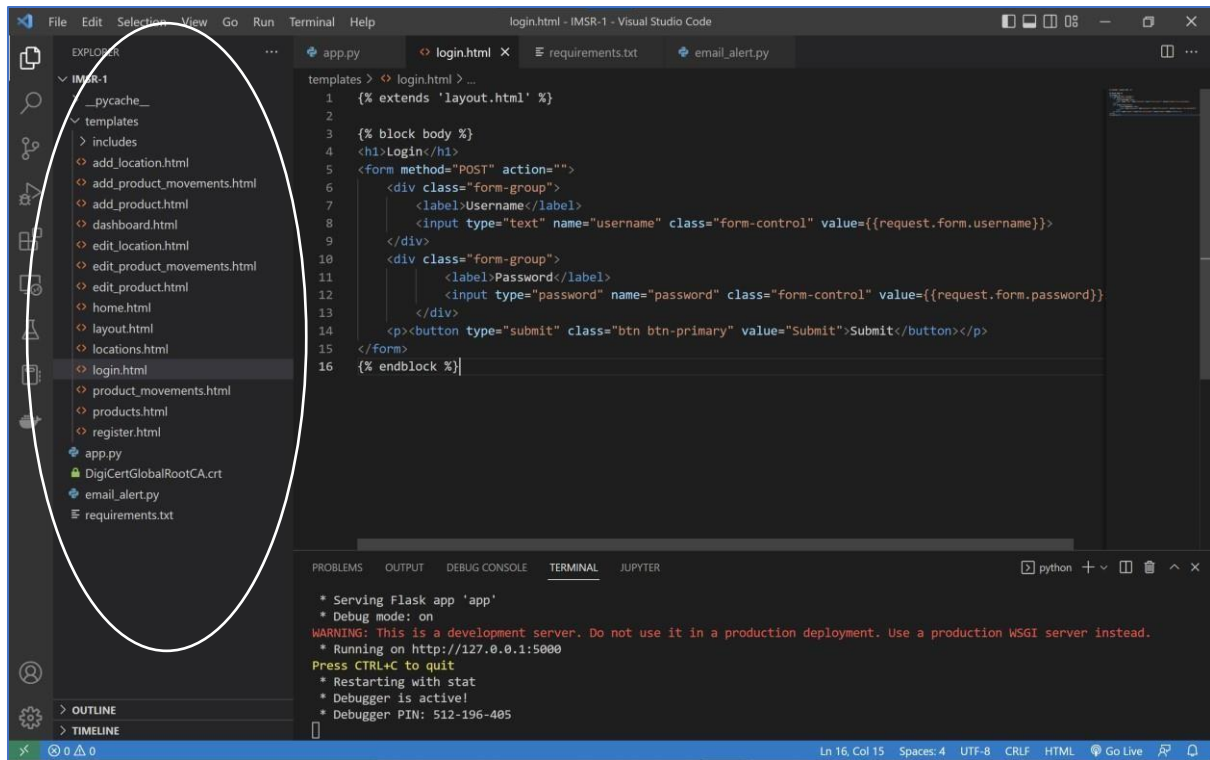

Ln 33, Col 29 Spaces: 4 UTF-8 CRLF Python 3.10.7 64-bit Go Live

Sprint 2 – Frontend:

The frontend is written using HTML, CSS (using Bootstrap) and JavaScript for all the pages to which the routes created in Sprint 1.

For Example, (The Hierarchy of different pages and the code for login page,

Sample FrontEnd Pages,

Login Page

The screenshot shows a web browser window with multiple tabs. The active tab is titled 'ibm-imr-project - IBM C'. The address bar shows the URL '169.51.207.105:30958/login'. The page header includes 'IMSR Home' on the left and 'Register Login' on the right. The main heading is 'Login'. Below it are two input fields: 'Username' and 'Password'. A blue 'Submit' button is positioned below the password field.

Products Page,

The screenshot shows a web browser window with multiple tabs. The active tab is 'ibm-imsr-project - IBM C', displaying the URL '169.51.207.105:30958/products'. The page has a navigation bar with 'IMSR', 'Home', 'Products', 'Location', and 'Product Movements'. A 'Logout' and 'Dashboard' link are in the top right. The main heading is 'Products', followed by a green 'Add Product' button. Below is a table with three columns: 'Product ID', 'Product Cost', and 'Product Quantity'. The table lists three products: 'Bedspreads' (Cost: 600, Quantity: 100), 'Cutlery' (Cost: 1500, Quantity: 495), and 'Shampoo' (Cost: 50, Quantity: 520). Each row has 'Edit' and 'Delete' buttons.

Product ID	Product Cost	Product Quantity		
Bedspreads	600	100	Edit	Delete
Cutlery	1500	495	Edit	Delete
Shampoo	50	520	Edit	Delete

Product Movements Page,

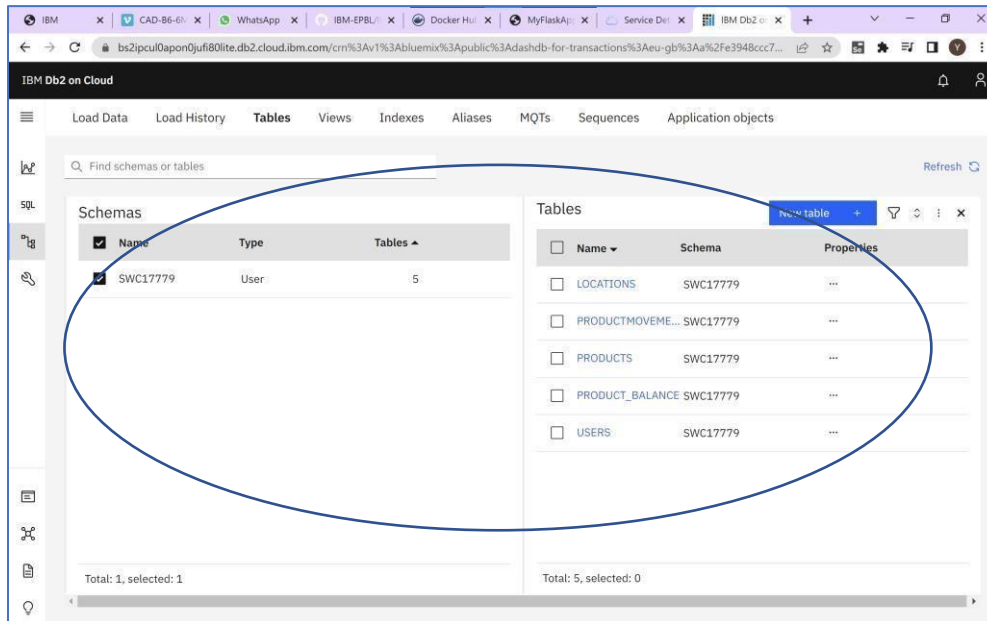

The screenshot shows a web browser window with multiple tabs. The active tab is 'ibm-imsr-project - IBM C', displaying the URL '169.51.207.105:30958/product_movements'. The page has a navigation bar with 'IMSR', 'Home', 'Products', 'Location', and 'Product Movements'. A 'Logout' and 'Dashboard' link are in the top right. The main heading is 'Product Movements', followed by a green 'Add Product Movements' button. Below is a table with six columns: 'Movement ID', 'Time', 'From Location', 'To Location', 'Product ID', and 'Quantity'. The table lists three movements: Movement ID 41 (Time: 2022-11-14 04:32:57.213981, From: Chennai, To: Main Inventory, Product: Shampoo, Quantity: 20), Movement ID 42 (Time: 2022-11-14 04:51:47.519001, From: Chennai, To: Karnataka, Product: Shampoo, Quantity: 1553), and Movement ID 40 (Time: 2022-11-14 03:57:52.649656, From: Bangalore, To: Chennai, Product: Shampoo, Quantity: 100). Each row has a 'Delete' button.

Movement ID	Time	From Location	To Location	Product ID	Quantity	
41	2022-11-14 04:32:57.213981	Chennai	Main Inventory	Shampoo	20	Delete
42	2022-11-14 04:51:47.519001	Chennai	Karnataka	Shampoo	1553	Delete
40	2022-11-14 03:57:52.649656	Bangalore	Chennai	Shampoo	100	Delete

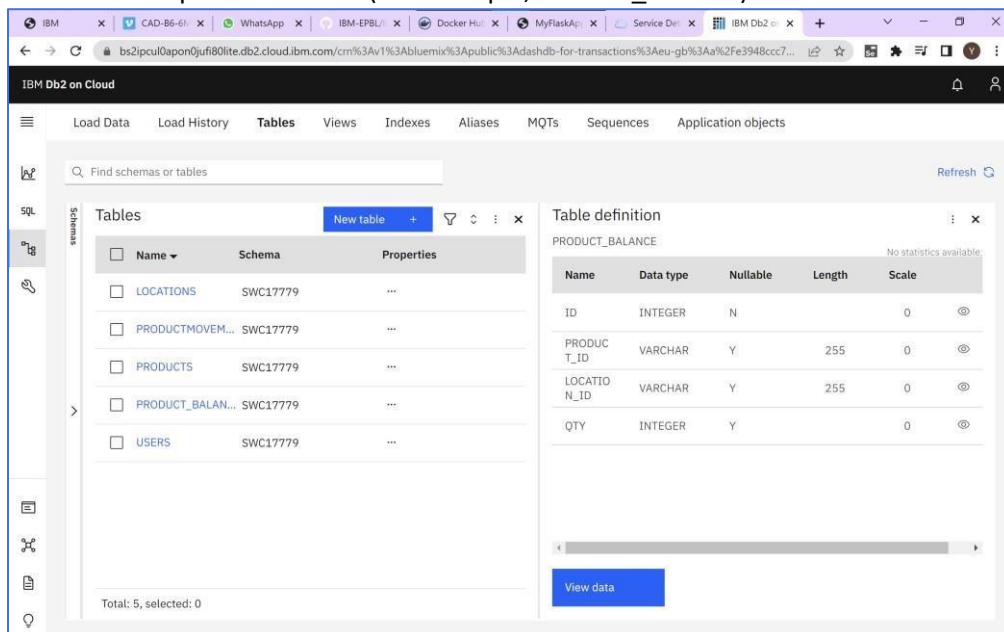

Sprint 3 - IBM Cloud Integration + Integration of SendGrid:

IBM Cloud Integration:

5 tables created for our project,

Schema of the particular table (For Example, Product_Balance)

Data of a particular table (For Example, Product_Balance)

IBM Db2 on Cloud

Load Data Load History **Tables** Views Indexes Aliases MQTs Sequences Application objects

SQL

SWC17779.PRODUCT_BALANCE

Export to CSV

ID	PRODUCT_ID	LOCATION_ID	QTY
1	Shampoo	Kerala	1350
2	Bedspreads	Kerala	100
3	Shampoo	Chennai	1452
4	Shampoo	Mumbai	100
5	Shampoo	Karnataka	-202
6	Shampoo	Punjab	100
7	Shampoo	Bangalore	-451
8	Cutlery	Bangalore	55

Code for Connection of IBM Database,

```
conn=ibm_db.connect("DATABASE=bludb;HOSTNAME=55fbc997-9266-4331-afd3-888b05e734c0.bs2io90l08kqb1od8lcg.databases.appdomain.cloud;PORT=;SECURITY=SSL;SSLServerCertificate=DigiCertGlobalRootCA.crt;UID=;PWD=','')"
```

Note: DigiCertGlobalRootCA.crt should be downloaded and configured within the project folder.

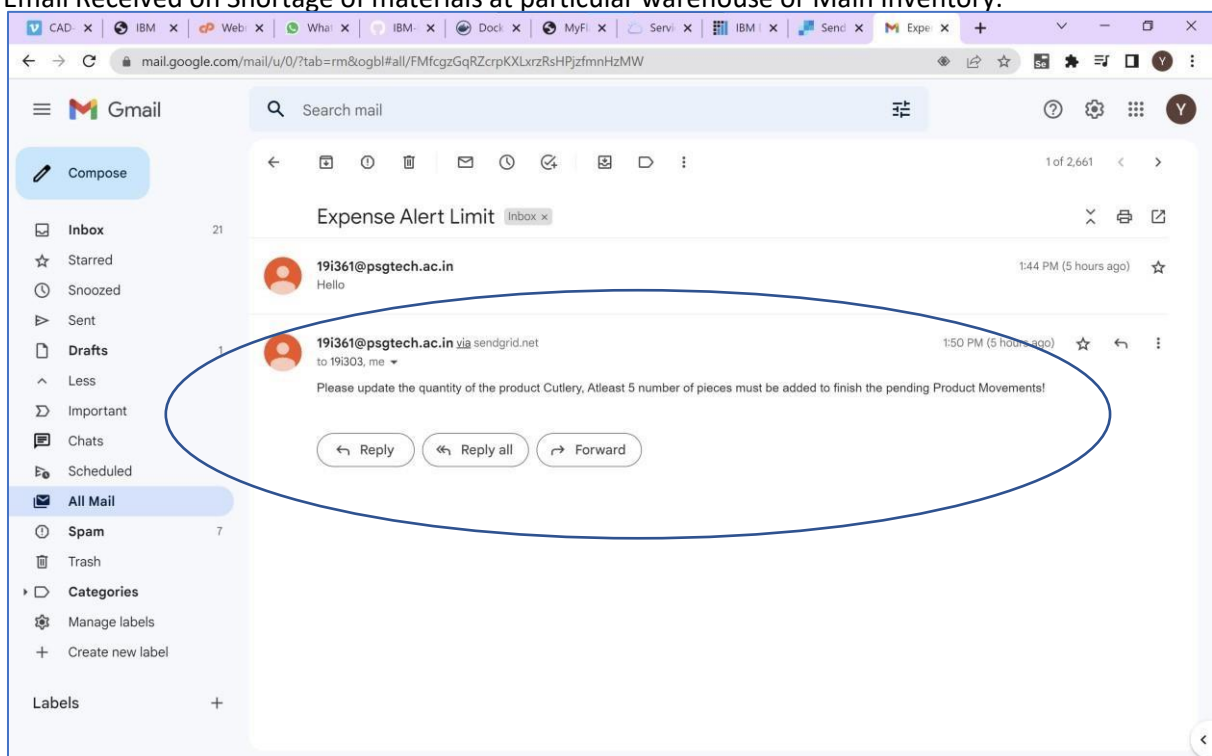

Code for email alert:

The screenshot shows the Visual Studio Code editor with the file `email_alert.py` open. The code defines an `alert` function that sends an email via SMTP. The terminal output shows the application running and detecting changes in the file, reloading, and restarting with state. The email alert function is as follows:

```
1 import smtplib
2 from email.mime.multipart import MIMEMultipart
3 from email.mime.text import MIMEText
4 from email.mime.base import MIMEBase
5
6 def alert(main_msg):
7     mail_from = '191361@psgtech.ac.in'
8     mail_to = '191303@psgtech.ac.in'
9     msg = MIMEMultipart()
10    msg['From'] = mail_from
11    msg['To'] = mail_to
12    msg['Subject'] = 'Alert Mail On Product Shortage! - Regards'
13    mail_body = main_msg
14    msg.attach(MIMEText(mail_body))
15
16    try:
17        server = smtplib.SMTP_SSL('smtp.sendgrid.net', 465)
18        server.ehlo()
19        server.login('apikey', 'API_KEY')
20        server.sendmail(mail_from, mail_to, msg.as_string())
21        server.close()
22        print("mail sent")
23    except:
24        print("issue")
25
```

The terminal output shows the application running and detecting changes in the file, reloading, and restarting with state.

Email Received on Shortage of materials at particular warehouse or Main Inventory:

Sprint 4 (Deploying the application using Docker and Kubernetes):

Note: Make sure to create a Dockerfile in the project folder.

Login into DockerHub in Project Folder using command prompt. This connects local docker desktop to cloud docker hub.

C:\Users\yaswa>
```

Then, Check for the public IP address in your IBM Kubernetes Cluster under Worker Node,

Thus we have the Public IP address and the Nodeport.

Now just type in this format - <Public_IP>:<NodePort>

For our Inventory management system application it is, **169.51.207.105:30958**

Type this in the browser and click enter to access the deployed application,

Result:

Thus In this way We developed a “Inventory management System for Retailers” using Python, Sendgrid and IBM Cloud Services (IBM DB2, IBM Container registry, IBM Kubernetes).
